

**REACH Declaration**

Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

With its fields of activity, Thöni Industriebetriebe GmbH falls under the definition of a downstream user according to Article 3, point 13 of the Regulation.

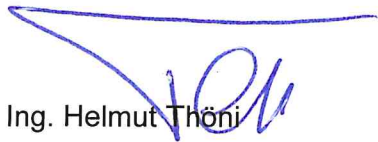

As a downstream user, Thöni Industriebetriebe GmbH is not obliged to pre-register chemical substances.

However, we comply with all REACH requirements that apply to us and regularly check compliance with the requirements.

Furthermore, we have had confirmation from all raw material suppliers or upstream actors in the supply chain that they assume responsibility for the pre-registration of affected substances or that only registered substances are used.

With our processes and controls within quality- and environmental management, we have also ensured that our external processing partners in the field of surface treatment comply with the applicable regulations to REACH.
